A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05 August 2008 has been entered. Claims 1-26, 28, and 31 have been cancelled. Claims 27, 29, and 30 remain in the case.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27, 29, and 30 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 27, 29, and 30, it is not clear what applicant intends as within the metes and bounds of the invention because it is not clear what is encompassed by "antigenic properties in common".

Applicant's arguments filed 05 August 2008 have been fully considered but they are not deemed to be persuasive.

Notwithstanding applicant's assertions to the contrary, applicant's amendments have not obviated rejections under this statute for the reasons set forth above.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27, 29, and 30 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Hoffman et al. (US 5,599,543) for reasons of record.

Claims 27, 29, and 30 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Geysen et al. (Proc. Natl. Acad. Sci. USA 81: 3998, 1984) for reasons of record.

Applicant's arguments filed 05 August 2008 have been fully considered but they are not deemed to be persuasive.

Notwithstanding applicant's assertions to the contrary, applicant's invention as is now claimed wherein capture reagents have "antigenic properties in common" does not exclude the peptide circumsporozoite protein repeat regions of different parasite species taught by the reference of Hoffman et al. or the homologues or structurally similar peptides of Geysen et al. in light of applicant's disclosure that merely solubility or molecular weight or being a homologue from a different species may be common properties shared by the controls and (relevant) capture reagent(s) (see e.g. specification page 4). Notwithstanding applicant's arguments to the contrary, those reactants serving as the negative controls are irrelevant capture reagents with regard to forming complexes with the analytes.

No claim is allowed.
